Project:

❖ **Mini project on Railway Data Monitoring using IoT.**

This project aims to connect IoT (Internet of Things) for railway data monitoring and controlling via World Wide Web. The system is based on RFID and NFC based ticketing system.

NFC has used concept of RFID technology to facilitate communication between two parties or devices .

❖ **Currently working on IoT based Video Surveillance System.**

Ensuring the safety of a protected area often involves periodically changing video surveillance positioning. We are using a Raspberry Pi, Pi camera, a Power supply for the Raspberry Pi, Robot chassis and an android phone or a webpage for the live streaming and controlling of our robot.
